LOUVRESYSTEMS

SUNSHIELD

CONTROL WITH STYLE

LOUVRESYSTEMS LTD

COMPLETE YOUR PROJECT WITH LOUVRESYSTEMS.

ANYWHERE THERE ARE LARGE AREAS OF GLASS LOUVRESYSTEMS BRING A NEW LEVEL OF COMFORT TO YOUR EVERYDAY ENVIRONMENT WITH SUNSHIELD LOUVRES.

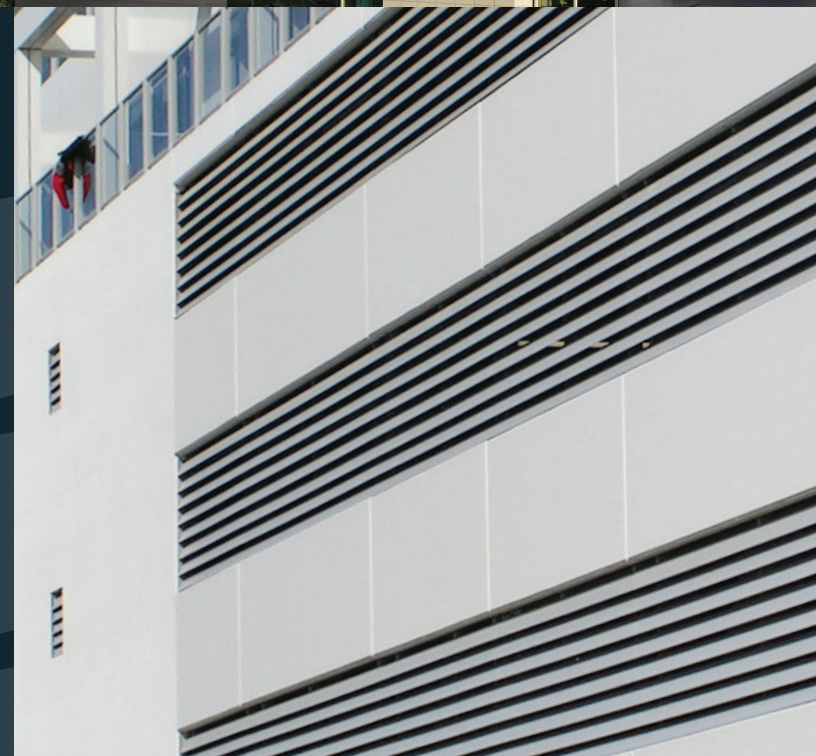

SUNSHIELD Louvres are designed to provide the ideal solution for temperature control, whether you want to control the heat in summer or maximize the light in winter. Available in a wide range of profiles from 80mm up to 400mm SUNSHIELD Louvres work wonders in providing a stylish contemporary look to your building.

SUNSHIELD Louvres are exceptionally durable, produced from New Zealand made aluminium, all SUNSHIELD Louvres are sun, wind and rain resistant. All fittings are stainless steel with UV-stabilised components and carry manufacturer's guarantees.

Colour options are endless and SUNSHIELD Louvres are available anodised, frost anodised and powder coated to the colour of your choice.

You choose how you would like your SUNSHIELD Louvres to work, they are available with our fixed clip or as adjustable and operable systems. Depending on your project requirements your SUNSHIELD Louvres can be manual, motorized or remote control. We can also link your louvres to sensors that automatically adjust to climate conditions which means your air conditioning system does not have to work so hard.

Today's homes and commercial buildings are being built closer and closer together and privacy is becoming more and more of an issue. Use SUNSHIELD Louvres for privacy as well as for protection from the elements, see our Applications brochure for many more innovative ways to use Louvres to add those finishing touches to your project.
